

# High security and bonded warehouse

## Optimal storage and protection of your valuables

### Discover the benefits of utmost security

Prosegur has been operating the high security and bonded warehouse in Neu-Isenburg near Frankfurt/Main since 2011. The facility offers unique possibilities for the storage and order picking of a broad range of valuables:

- Foreign notes and coins
- Precious metals
- Class I and II securities

Renowned clients from industries requiring high-level security rely on Prosegur's high security warehouse:

- Banks
- Precious metals traders
- Coin traders
- Refineries/foundries
- Non-European mints

### Storage service

With an overall 1,000 m<sup>2</sup> of storage space, the high security warehouse offers optimal capabilities to store valuables – of any size and **up to 4.5 t/m<sup>2</sup>**. Partition walls segregate individual client spaces as and when required.

The professional inventory management system „Metallicum“ tracks the movement of valuables and manages stocks which are captured and communicated to the client on a daily basis.

### Pick and Pack

In addition to storing, Prosegur also handles order picking and shipping of foreign notes and coins, precious metals and securities across Germany on your behalf.

Your advantage: Goods you have bought arrive directly in the high security warehouse - your staff needn't get involved. Prosegur picks, packs and ships valuables once they have been sold in a **secure and reliable** process within Prosegur's proprietary cash and valuables logistics system.

You need not invest in vaults and expensive security technology on your premises and are free to focus on doing business with your clients.

### Bonded warehouse

A section of the high security storage facility is set up as a tax-free area. Storage in this bonded warehouse enables you to defer payment of VAT and customs duties until the goods leave the warehouse for an EU destination. The result is a **significant cash flow advantage**.

You also **save precious time** – a clear benefit in today's volatile precious metals markets. Prosegur handles customs clearance when taking delivery at the warehouse so that your goods are typically ready for shipment across Germany the very next day.

### Exceptional service levels from a central location

Located in the very heart of Germany, the high security warehouse offers ideal conditions:

- 1,000 m<sup>2</sup> of storage space
- Storage service
- Picking service
- Bonded warehouse
- Short shipping distances

Alongside its high security and bonded warehouse in Neu-Isenburg, Prosegur has 30 branches across Germany. Additional storage facilities are planned

## Highest security standards

- ⊗ Biometric access control system
- ⊗ Camera surveillance (CCTV)
- ⊗ Acoustic and infrared sensors
- ⊗ 80 cm reinforced concrete with security doors
- ⊗ Smokescreen systems in all secure areas
- ⊗ Perimeter (outdoor) protection of the entire building
- ⊗ Opening under the four-eye principle only via remote monitoring by Prosegur's security control centre
- ⊗ Fully double-locked vaults for each client

### Impressive security architecture

Prosegur's high security warehouse offers optimal conditions, even from a merely physical perspective: Originally constructed for the Federal Printing Office and used to print D-Mark notes, the premises were later converted into a central coins deposit by the German central bank to facilitate the transition to the euro.

Its protective arsenal was even substantially enhanced for our current use (see box on the left).

### Maximum protection

As in major banks, the high security warehouse's alarm system has a direct link to the police which will be on site in a matter of minutes in an emergency. Naturally, all stored assets are appropriately insured.

### About Prosegur

Prosegur GmbH, a subsidiary of Prosegur Compañía de Seguridad S.A., is the German market leader in cash and valuables in transit and offers extensive security logistics services.

Its portfolio includes cash management solutions, ATM services, valuables and courier logistics, bonded storage and the planning and implementation of security concepts.

Prosegur currently employs over 158,000 people globally; 4,000 of these work in Germany. Prosegur is the only provider in the sector to operate a national network with currently 31 branches across Germany.

**Benefit from these capabilities to give your valuables the best possible protection. Prosegur experts will be happy to advise you on storage - and beyond.**
